

**GEN 1.4 ENTRY, TRANSIT AND DEPARTURE OF CARGO****1 CUSTOMS REQUIREMENTS CONCERNING CARGO AND OTHER ARTICLES**

For goods circulating within the EU no customs formalities are required.

Customs documents are required for the clearance of goods for the following destination:

- a. Temporary storage in a temporary storage facility on the airport.
- b. Importation.
- c. Customs transit.

Most of the required forms (national, Common Market or other international ones) are aligned on the same layout. In certain cases an oral declaration can be made.

Exemptions can be granted for arms and munitions carried in transit as part of the cargo of an aircraft arriving from abroad at an international airport provided they are re-exported by air to a destination abroad within seven days of landing. In order to obtain an exemption, the captain of the aircraft must give written notification, immediately after landing, of the presence of arms and munitions in the cargo to the Commander of the department or unit of the Royal Military Constabulary stationed at the airport, or in his absence, to the local Chief of Police, if necessary in consultation with the Customs authorities. In the event of the arms or munitions being unloaded from the aircraft or transshipped, and not immediately re-exported, they must be stored in a Customs storage facility at the airport. Moreover, weapons and munitions may only be unloaded or transshipped after the government of the country for which they are destined has confirmed that it has no reservations about their being imported.

With regard to cargo merely transshipped under customs supervision from one aircraft to another for re-exportation at the same airport and to cargo forwarded by air to another international airport in the Netherlands no customs documents are required. If the latter takes place by other means of transport, documents for customs transit are required.

No clearance documents are required with respect to goods retained on board an aircraft for oncarriage to a destination outside the Netherlands.

Upon exportation the following documents are required for the clearance of shipments to be exported by air:

- a. An export declaration form dependent on the status of the goods.
- b. A cargo manifest.
- c. In some cases special documentation is required (licenses, registration forms, etc.).

**2 AGRICULTURAL QUARANTINE REQUIREMENTS**

For the following animals and plants shipments there are quality and health regulations:

- animal protein <sup>1)</sup>
- animals: endangered species
- animals: one-hoofed species
- bees
- birds
- cattle
- cattle minks
- cats
- cherries
- cod-liver oil
- combs and hives
- dogs
- eggs
- egg products
- fat
- fish
- flowers

- meat
- meat products
- mussels
- pigs
- plants and part of plants
- potatoes
- poultry
- sheep
- strawberry plants
- tulip bulbs

<sup>1)</sup> With exemption of milk and milk products.

**3 TRANSPORT OF DANGEROUS GOODS**

The regulations on the transport of dangerous goods by air are based on Annex 18 to the Convention of Chicago (1944) and on the ICAO Technical Instructions for the Safe Transport of Dangerous Goods by Air, current edition.

They are applicable to:

- a. Dangerous goods on an aerodrome, including warehouses etc., or in an aircraft intentionally to be carried by air, carried by air or after transport by air.
- b. Every natural person or corporate body who offers dangerous goods as mentioned under a. for transport by air.
- c. Every natural person or corporate body, who offers dangerous goods for transport by air, on behalf of whom the transport of dangerous goods by air is carried out or who actually carries dangerous goods by air.

d. Every natural person or corporate body who is directly involved in the transport of dangerous goods by air.

As an alternative to the use of the current ICAO Technical Instructions the current IATA Dangerous Goods Regulations may be used. Further information about the carriage of dangerous goods can be obtained from the competent authority:
