

EHLE — LELYSTAD/Lelystad

Note: the following sections in this chapter are intentionally left blank:
AD 2.21.

EHLE AD 2.1 AERODROME LOCATION INDICATOR AND NAME

EHLE — LELYSTAD/Lelystad

EHLE AD 2.2 AERODROME GEOGRAPHICAL AND ADMINISTRATIVE DATA

| | | |
|----------|-----------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | ARP co-ordinates and site at AD | 522712N 0053050E 249 DEG GEO 755 M from TWR. |
| 2 | Direction and distance from (city) | 3.5 NM SSE from Lelystad |
| 3 | Elevation/reference temperature | -12 FT AMSL/22°C (JUL/AUG) |
| 4 | Geoid undulation at AD ELEV PSN | 141 FT |
| 5 | MAG VAR/annual change | 2° E(2020)/0°09' E |
| 6 | AD operator, postal address, telephone, telefax, email, AFS, website | Post: Lelystad Airport P.O. Box 2201 8203 AE Lelystad The Netherlands Tel: +31 (0)88 600 9770 Email: operations@lelystadairport.nl URL: https://www.lelystadairport.nl |
| 7 | Types of traffic permitted (IFR/VFR) | IFR/VFR |
| 8 | Remarks | 1. The aerodrome is available for national and international civil air traffic with a maximum wingspan up to 36 meters. PPR for aircraft with a wing-span of 24 meters or more. 2. PPR for aircraft with a MTOM of 100.000 KG or more. 3. IFR OPS 24 HR PPR via operations@lelystadairport.nl . 4. AD not AVBL as commercial alternate. 5. The import and export of cargo and cargo in transit is not allowed. |

EHLE AD 2.3 OPERATIONAL HOURS

| | | |
|-----------|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | AD operator | MON-SUN: 0600-2100 (0500-2000). |
| 2 | Customs and immigration | AD OPR HR, 3 HR PN. ^{1)²⁾} |
| 3 | Health and sanitation | NA |
| 4 | AIS briefing office | H24 Tel: +31 (0)20 406 2315 URL: https://www.homebriefing.nl |
| 5 | ATS reporting office (ARO) | Competent ATS unit: ARO Schiphol, see EHAM AD 2.3. |
| 6 | MET briefing office | H24 |
| 7 | ATS | AD OPR HR. |
| 8 | Fuelling | AD OPR HR. |
| 9 | Handling | Limited by AD authority, O/R. |
| 10 | Security | NA |
| 11 | De-icing | NA |
| 12 | Remarks | ¹⁾ PN means notification other than by flight plans (IFR/VFR) to aerodrome authority as appropriate. ²⁾ All general aviation flights to and from the non-Schengen countries shall submit a general declaration at least 2 hours prior departure/arrival via www.gendec.eu . See GEN 1.2. |

EHLE AD 2.4 HANDLING SERVICES AND FACILITIES

| | | |
|----------|----------------------------------|---------------------------------------|
| 1 | Cargo-handling facilities | NIL |
| 2 | Fuel/oil types | AVGAS UL94, AVGAS 100LL, Jet A-1/NIL. |

| | | |
|---|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3 | Fuelling facilities/capacity | Fuel station Charlie AVGAS UL94: self-service with debit card or credit card (VISA, Mastercard). Fuel station Delta AVGAS 100LL: self-service with debit card or credit card (VISA, Mastercard). Jet A-1: self-service with debit card or credit card (VISA, Mastercard); by truck (with pressure refuelling). AVBL MON-SUN 0700-2100 (0600-2000) O/R via AD OPS, TEL +31 (0)88 600 9792. D-Apron Two charging facilities AVBL (MAX 60 KWH), O/R. |
| 4 | De-icing facilities | NA |
| 5 | Hangar space for visiting aircraft | Limited, O/R. |
| 6 | Repair facilities for visiting aircraft | Limited AVBL, O/R. |
| 7 | Remarks | NIL |

EHLE AD 2.5 PASSENGER FACILITIES

| | | |
|---|-----------------------------|-----------------------------------------------------------|
| 1 | Hotels | Sufficient accommodation in Lelystad and Harderwijk. |
| 2 | Restaurants | In Lelystad and Harderwijk. |
| 3 | Transportation | Rental cars, buses and taxis. Limited AVBL (and O/R). |
| 4 | Medical facilities | First aid treatment, hospital in Lelystad and Harderwijk. |
| 5 | Bank and post office | AVBL in Lelystad and Harderwijk. |
| 6 | Tourist office | AVBL in Lelystad and Harderwijk. |
| 7 | Remarks | NIL |

EHLE AD 2.6 RESCUE AND FIRE FIGHTING SERVICES

| | | |
|---|----------------------------------------------------|-------------------------------------------|
| 1 | AD category for fire fighting | CAT 5 ¹⁾ |
| 2 | Rescue equipment | 2 crash-tenders. |
| 3 | Capability for removal of disabled aircraft | Hoist and lift capacity limited AVBL. |
| 4 | Remarks | ¹⁾ CAT 6 and 7 AVBL 72 HR PPR. |

EHLE AD 2.7 SEASONAL AVAILABILITY - CLEARING

| | | |
|---|------------------------------------|---------------------------------------------------------------------------------------------------------|
| 1 | Types of clearing equipment | 2 snowsweep combinations with ploughs, 2 snowploughs, 2 snowblowers, 2 de-icing cars. |
| 2 | Clearance priorities | RWY including run-up areas, TWY, apron. |
| 3 | Remarks | 1. Material for movement area surface treatment: KFOR. 2. No specially prepared winter runways AVBL. |

EHLE AD 2.8 APRONS, TAXIWAYS AND CHECK LOCATIONS/POSITIONS DATA

| 1 | Apron surface and strength | Apron | Surface | Strength |
|---|-----------------------------------|--------------|----------------------|-------------------------------------|
| | | D | Asphalt and concrete | PCN 19/F/D/W/T PCR 220/F/D/X/T |
| | | F | Asphalt and concrete | PCN 19/F/D/W/T PCR 180/F/D/X/T |
| | | H | Asphalt and concrete | PCN 19/F/D/W/T PCR 100/F/C/Y/T |
| | | L | Concrete | PCN 65.0/R/B/W/T PCR 820/R/A/W/T |

| 2 | Taxiway width, surface and strength | TWY | Width | Surface | Strength (PCN) |
|-----------------|----------------------------------------------------|-------------------------------------------------------------------------|-------------------------------------|----------------|-----------------------|
| A | 23.0 M | Asphalt | PCN 55.0/F/B/W/T PCR 800/F/B/W/T | | |
| A1 | 23.0 M | Asphalt | PCN 55.0/F/B/W/T PCR 800/F/B/W/T | | |
| A2 | 23.0 M | Asphalt | PCN 55.0/F/B/W/T PCR 800/F/B/W/T | | |
| N | 23.0 M | Asphalt | PCN 55.0/F/B/W/T PCR 800/F/B/W/T | | |
| N1 | 23.0 M | Asphalt | PCN 55.0/F/B/W/T PCR 800/F/B/W/T | | |
| N2 | 23.0 M | Asphalt | PCN 55.0/F/B/W/T PCR 800/F/B/W/T | | |
| N3 | 23.0 M | Asphalt | PCN 55.0/F/B/W/T PCR 800/F/B/W/T | | |
| N4 | 23.0 M | Asphalt | PCN 55.0/F/B/W/T PCR 800/F/B/W/T | | |
| S (north of S5) | 15.0 M | Asphalt | PCN 19.0/F/D/W/T PCR 220/F/D/X/T | | |
| S (south of S5) | 15.0 M | Asphalt | PCN 50.0/F/A/W/T PCR 610/F/D/X/T | | |
| S1 | 15.0 M | Asphalt | PCN 19.0/F/D/W/T PCR 220/F/D/X/T | | |
| S2 | 10.5 M | Asphalt | PCN 4.0/F/D/W/T PCR 100/F/D/X/T | | |
| S3 | 10.5 M | Asphalt | PCN 4.0/F/D/W/T PCR 100/F/D/X/T | | |
| S4 | 10.5 M | Asphalt | PCN 19.0/F/D/W/T PCR 220/F/D/X/T | | |
| S5 | 15.0 M | Asphalt | PCN 19.0/F/D/W/T PCR 610/F/D/X/T | | |
| S7 | 15.0 M | Asphalt | PCN 50.0/F/A/W/T PCR 610/F/D/X/T | | |
| 3 | Altimeter checkpoint location and elevation | Location: apron. Elevation: -13 FT AMSL. | | | |
| 4 | VOR checkpoints | NIL | | | |
| 5 | INS checkpoints | NIL | | | |
| 6 | Remarks | TWYs S2, S3 and S4 only AVBL for aircraft with a MAX wheel span of 6 M. | | | |

EHLE AD 2.9 SURFACE MOVEMENT GUIDANCE AND CONTROL SYSTEM AND MARKINGS

| | | |
|----------|----------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Use of aircraft stand ID signs, TWY guide lines and visual docking/parking guidance system at aircraft stands | Follow-me car and marshaller assistance AVBL at D- and L-apron. |
| 2 | RWY and TWY markings and LGT | <p>RWY markings</p> <ul style="list-style-type: none"> RWY 05: DTHR, designation, TDZ, aiming point, CL, edge. RWY 23: DTHR, designation, TDZ, aiming point, CL, edge. <p>RWY LGT</p> <ul style="list-style-type: none"> RWY 05: THR, CL, edge, RWY end. RWY 23: THR, CL, edge, RWY end. <p>TWY markings</p> <ul style="list-style-type: none"> CL. Edge. HLDG PSN. MAX wheel span markings S2-S4¹⁾. Mandatory instruction signs at all HLDG PSN. <p>TWY LGT</p> <ul style="list-style-type: none"> No CL LGT; green retroreflective CL markers on A, A1, A2, part of N, S1 and abeam S4. Edge LGT. Runway guard LGT at all HLDG PSN except S6. |
| 3 | Stop bars | NIL |
| 4 | Remarks | ¹⁾ MAX wheel span information markings indicate TWYs where operations are limited to aircraft not exceeding the MAX wheel span specified. |

EHLE AD 2.10 AERODROME OBSTACLES

| Area 2 | | | | | |
|-------------------------|-----------|---------------|----------------|-----|-------------------------------|
| OBST ID/ Designation | OBST type | OBST position | ELEV/HGT in FT | | Markings/ LGT type, colour |
| | | | AMSL | AGL | |
| 1 | 2 | 3 | 4 | | 5 |
| - | - | - | - | - | - |

| Area 3 | | | | | |
|-------------------------|---------------|----------------------|----------------|------|-------------------------------|
| OBST ID/ Designation | OBST type | OBST position | ELEV/HGT in FT | | Markings/ LGT type, colour |
| | | | AMSL | AGL | |
| 1 | 2 | 3 | 4 | | 5 |
| EHLE013 | Control tower | 522720.7N 0053127.4E | 72.2 | 85.2 | R W/ LIL type B, R |

| Remarks | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 6 | |
| <ul style="list-style-type: none"> • Obstacles penetrate ICAO Annex 14 Volume I obstacle limitation surfaces. • No obstacle data sets AVBL for area 2 and 3. | |

For obstacles in take-off areas see AD 2.EHLE-AOC-05-23.

EHLE AD 2.11 METEOROLOGICAL INFORMATION PROVIDED

| | | |
|----|---------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Associated MET office | De Bilt |
| 2 | Hours of service MET office outside hours | H24 - |
| 3 | Office responsible for TAF preparation Periods of validity | De Bilt 30 HR |
| 4 | Trend forecast Interval of issuance | TREND 30 MIN, AVBL during AD OPR HR. |
| 5 | Briefing/consultation provided | Self-briefing; briefing on request from MWO De Bilt by telephone after self-briefing (see item 10). |
| 6 | Flight documentation Language(s) used | Reports, forecasts, charts. English, Dutch. |
| 7 | Charts and other information available for briefing or consultation | S, P, W, T |
| 8 | Supplementary equipment available for providing information | WXR, APT |
| 9 | ATS units provided with information | Lelystad TWR, Lelystad APP. |
| 10 | Additional information (limitation of service, etc.) | TEL: 0900 202 3341 Briefing low level flights (IFR/VFR). TEL: 0900 202 3343 Briefing IFR flights above FL 100. TEL: 0900 202 3340 Briefing balloon flights within Amsterdam FIR. Note: charge for TEL briefings and consultations is €0.50/MIN. Note: weather bulletin (Dutch language) and AUTO METARs via Dutch public television 'Teletekst' page 707. |

EHLE AD 2.12 RUNWAY PHYSICAL CHARACTERISTICS

| Designations RWY NR | True BRG | Dimensions of RWY (M) | Strength (PCN) and sur- face of RWY and SWY | THR co-ordinates RWY end co-ordinates THR GUND | THR elevation and highest elevation of TDZ of precision APCH RWY |

EHLE AD 2.20 LOCAL AERODROME REGULATIONS

1 IFR ROUTE AVAILABILITY

The IFR departure and arrival routes are **not available** for scheduled and non-scheduled passenger flights UFN. Business aviation and GA operators shall contact airport authority.

2 RUNWAY RESERVATIONS

For more information on the usage of LARSA (Lelystad airport runway scheduling application), see <https://www.lelystadairport.nl>.

3 RESTRICTIONS ON VFR TRAINING FLIGHTS

Use of the VFR training circuit is limited to MON-SUN: 0600-1800 (0500-1700) during UDP.

4 FORMATION TAKE-OFFS AND LANDINGS

Formation take-offs and landings are not allowed except with a pre-arranged operational agreement with ATC. Contact atmprocedureservices@lvnl.nl for such an agreement.

5 GROUND MOVEMENT OPERATIONS

Follow-me service is mandatory on:

- TWY S for aircraft with wingspan >24 M;
- TWYs S1, S5 and S7 for aircraft with outer main gear wheel span >9 M.

EHLE AD 2.22 FLIGHT PROCEDURES

1 INSTRUMENT DEPARTURE PROCEDURES

1.1 Introduction

The instrument departure procedures are based on ICAO Annex 2 and on ICAO Documents 4444-ATM/501 (PANS-ATM), 7030 (SUPPS) and 8168-OPS/611 (PANS-OPS).

1.2 Instrument departure procedures

1.2.1 Start-up permission

Pilots shall request start-up permission from ATC before starting engines. When applicable, report a cross-bleed start. The request for start-up shall be made to Lelystad Delivery after all preparations for departure have been made (doors closed etc.) and shall include:

- aircraft identification (e.g. TRA345).
- position (e.g. L4) or entry point manoeuvring area (e.g. G1).
- ATIS information (e.g. information R).
- flight rules (e.g. IFR).
- destination (e.g. Heraklion).
- request start-up.

Permission for start-up will be issued either immediately or at a specified time. The pilot shall be able to comply with start-up and taxi permission. Any delay in start-up or taxiing shall be reported to ATC immediately. In case of indefinite delay, the probable duration of delay will be given.

During the hours of the ATIS broadcast no MET information will be issued to departing aircraft except RVR (see EHLE AD 2.18).

Note: when EHR49 is active the AMGOD and IDRID SID cannot be used.

Note: when EHR8A is active the AMGOD SID cannot be used.

1.2.2 En-route clearance

1.2.2.1 Contents

The en-route clearance will be issued after start-up clearance has been given by Lelystad Delivery. An en-route clearance contains:

- a. Clearance limit: airport of destination.
- b. Standard instrument departure (SID).
- c. Cleared level.
- d. SSR code.
- e. Departure instructions if applicable.
- f. CTOT if applicable.

Example of an en-route clearance: "TRA345 cleared to Heraklion, NAPRO 1L Departure, cleared FL 060 according to step climb, squawk 2123".

1.2.2.2 Standard instrument departures

The instrument departure procedures are laid down in standard instrument departures (SIDs). SIDs are published for RWY 05 and 23.

Note: if not able to comply with the crossing conditions prescribed in the SIDs, inform Lelystad Delivery.

Note: only flights of wake turbulence category LIGHT are allowed to file a flight plan with a requested flight level below FL 060. Expect additional ATC instructions.

1.2.2.3 Departure instructions (paragraph 1.2.2.1 item e)

Instructions containing deviations from the standard instrument departure may be added to the en-route or take-off clearance. These instructions may comprise maintaining a specified heading or temporary altitude restrictions; these additional instructions amend the relevant part of the SID only.

1.2.2.4 General instructions

Due to interaction with other routes pilots must ensure strict compliance with the specified climb profile.

1.2.3 Taxi procedures

Aircraft shall request taxi clearance from Lelystad Tower.

1.3 Communication failure

- Select transponder code 7600.
- If possible call Amsterdam ACC Supervisor on telephone number +31 (0)20 406 3999.

Note: Use telephone connection to mitigate COM failure only. All telephone calls will be automatically recorded.

- If telephone connection is disconnected prematurely (before read-back), revert to general communication failure procedure (see ENR 1.3).

Additionally: proceed on the departure route according to expected FLs in SID tables (see paragraph 1.4).

1.4 SID descriptions

1.4.1 General remarks

1.4.1.1 Procedures and constraints

- Transition altitude: 3000 ft AMSL.
- SIDs are based on an average climb rate of 2000 ft/min.
- SIDs shall be strictly adhered to.
- Initiate turns in due time in order not to overshoot radials.
- Turn radii based on a 25° bank angle.
- MAX 250 KIAS below FL 100 unless otherwise instructed.
- For continuous routings and crossing conditions on ATS routes as applicable see paragraph 1.4.3.
- IFR departures are **not available** for scheduled and non-scheduled passenger flights UFN (see AD 2.20).

1.4.1.2 Application of RNAV

All SIDs require the use of RNAV routes stored in a pre-programmed navigation database on board of aircraft.

Furthermore:

- Connect FMS as early as possible.
- The LExxx-waypoints shall not be used in RTF procedures.
- Turn anticipation is mandatory for all waypoints except those which are underlined, these waypoints shall be overflown.

1.4.2 Specific remarks

- Both AMGOD and BERGI SIDs lead to AMGOD, be sure to follow the correct route.
- Both IDRID and VOLLA SIDs lead to IDRID, be sure to follow the correct route.
- BERGI, IDRID and VOLLA SIDs: only available for flights with requested flight/cruising level FL 140 or above.
- INKET SID: only for aircraft with destination EHRD.
- RUMER SID: only for aircraft with destination EHBD, EHBK, or EHEH.
- RNAV1 required.

1.4.3 Continuous routings for Lelystad SIDs with crossing conditions on ATS routes as applicable

Note: REF EHLE AD 2.22 paragraph 1.2.2 "En-route clearance": if not able to comply with the crossing conditions prescribed in the SIDs, inform Lelystad Delivery before take-off.

| ARNEM Departures | |
|-------------------------|--------------------------------------------------------------------------------|
| L620 | If the requested flight level is above FL 245, cross OLDOD at or above FL 250. |
| KUDAD Departures | |
| N872 | If the requested flight level is above FL 245, cross AMMOF at or above FL 260. |
| NAPRO Departures | |
| Z739 | If the requested flight level is above FL 245, cross AMOSU at or above FL 250. |

2 INSTRUMENT APPROACH PROCEDURES

2.1 Introduction

The arrival, instrument approach and holding procedures are based on ICAO Annex 2 and on ICAO Documents 4444-ATM/501 (PANS-ATM), 7030 (SUPPS) and 8168-OPS/611 (PANS-OPS).

2.2 Holding UVOXI

- Expect radar vectors to UVOXI.
- Holding levels are FL 090, FL 080, FL 070, FL 060. FL 090 will be used first due to noise abatement requirements.
- Exit holding route UVOXI – TENLI – BADEX (IAF).

2.3 Approach

Note: an aircraft vectored to intercept final approach shall report to ATC when established on the final approach track (ICAO Doc 4444-ATM/501 (PANS-ATM) chapter 8.9.4.1).

2.3.1 General

2.3.1.1 Approach procedures to RWY 05

RNAV to ILS or LOC approach:

- Initial and intermediate approach segment: RNAV1 transition from IAF to FAP/FAF;
- Final approach segment: ILS or LOC final approach;
- Missed approach segment: RNAV1 missed approach.

RNP approach:

- Initial and intermediate approach segment: RNAV1 transition from IAF to FAP/FAF;
- Final approach segment: RNP final approach;
- Missed approach segment: RNAV1 missed approach to ASBES.

Remarks:

- Notice the large localizer interception angle of 88 degrees.
- Notice the short distance between IF and FAF available for final course interception. The length of the intermediate segment (2.2 NM) is shorter than the ICAO minimum in case of a final approach interception angle of more than 60 degrees (3.0 NM).

2.3.1.2 Approach procedure to RWY 23

RNP approach:

- Initial and intermediate approach segment: RNAV1 transition from IAF to FAP/FAF;
- Final approach segment: RNP final approach;
- Missed approach segment: RNAV1 missed approach to KUVOS.

2.3.1.3 Visual approach

Visual approach allowed only when in the final approach segment.

2.3.1.4 Circling approach

Circling approaches are not allowed.

2.3.1.5 Aircraft and operator requirements

For the use of all IFR approach procedures to EHLE the following requirements are applicable:

- The aircraft must be equipped with an FMS comprising a pre-loaded navigation database and a navigation display.
- The aircraft FMS must use GNSS as the primary navigation sensor.
- The operator must hold an RNAV1 operations approval issued by their state of registry, which is compliant with the ICAO Document 9613 Performance-based Navigation (PBN) Manual or equivalent.
- The operator must hold an RNP APCH operations approval issued by their state of registry, which is compliant with the ICAO Document 9613 Performance-based Navigation (PBN) Manual or equivalent.

2.4 Missed approach procedure

See relevant instrument approach chart AD 2.EHLE-IAC-xx.x.

After second missed approach, follow the relevant SID to the alternate airport.

2.5 Communication failure

2.5.1 General

- Select transponder code 7600.
- If possible call Amsterdam ACC Supervisor on telephone number +31 (0)20 406 3999.
Note: Use telephone connection to mitigate COM failure only. All telephone calls will be automatically recorded.
- If telephone connection is disconnected prematurely (before read-back), revert to general communication failure procedure.

For the general procedures for IFR flights see ENR 1.3 paragraph "Communication Failure". In addition for arriving flights, the following communication failure procedures apply.

2.5.2 Traffic flying before the IAF

- Proceed according to the current flight plan route to the appropriate IAF (BADEX or EKNON);
- Commence descent to cross BADEX or EKNON at FL 060; except traffic via RKN: cross NILMI at FL 060;
- At BADEX or EKNON carry out an instrument procedure to the received and acknowledged runway or the runway-in-use as is included in the ATIS broadcast (see AD 2.EHLE-IAC-xx.x).

2.5.3 Traffic flying beyond the IAF

- Proceed according to instrument procedure, or;
- When vectored, proceed on the instrument procedure from XIDES to RWY 05 or IDGOK to RWY 23.

2.5.4 Traffic in UVOXI holding

- Proceed from UVOXI via TENLI to BADEX;
- Commence descent to cross BADEX at FL 060;
- At BADEX execute an instrument procedure to the received and acknowledged runway or the runway-in-use as is included in the ATIS broadcast (see AD 2.EHLE-IAC-xx.x).

2.5.5 Missed approach procedure in case of communication failure

See the relevant instrument approach chart AD 2.EHLE-IAC-xx.x.

After second missed approach, follow the relevant SID to the alternate airport.

2.6 Instrument approach descriptions

Note: recommended navaid for selection of MAG station declination only.

Note: for positions of LExxx-waypoints see relevant instrument approach charts.

2.6.1 ILS or LOC approach RWY 05

| Serial number | Path descriptor | WPT ident | Fly-over | Course/Track °MAG / (°T) | Recom. navaid | Dist. (NM) | Turn | Altitude (FT / FL) | Speed (KIAS) | VPA (°) / TCH (FT) | NAV specification |

3 LOW VISIBILITY PROCEDURES

During periods of low visibility the overall ATC capacity is reduced. To guarantee aircraft safety and optimal use of ATC capacity, Lelystad Airport uses ATC low visibility procedures. When the visibility is equal to or below 1500 M and/or the ceiling is equal to or below 300 FT, cautionary measures are taken. Four low visibility phases are recognised:

| Phase | Conditions | Procedure |
|-------|-----------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A | Lowest RVR <= 1500 M and/or ceiling <= 300 FT | No conditional clearances. Limited use of intersection take-offs. |
| B | Lowest RVR < 550 M and/or ceiling < 200 FT | Taxiing only allowed under the guidance of a marshaller or with a follow-me car. If no marshaller/car is available, ATC may give permission to taxi if no other aircraft is moving or expected to be moving in the manoeuvring area. |
| C | Lowest RVR < 350 M | RWY 05/23 will only be used for departing aircraft. Taxiing only allowed under the guidance of a marshaller or with a follow-me car. If no marshaller/car is available, ATC may give permission to taxi if no aircraft is moving or expected to be moving in the manoeuvring area. |
| D | Highest RVR < 100 M | The airport is below operational limits for arriving and departing aircraft. |

4 VFR FLIGHT PROCEDURES AND REGULATIONS

Note: for visual approach chart and visual traffic circuits see AD 2.EHLE-VAC.1 and AD 2.EHLE-VAC.2.

4.1 General

- All VFR flights within the Lelystad CTR shall submit a flight plan (see ENR 1.10).

2. Pilots shall adhere to the approach or departure route as indicated on the charts, unless otherwise instructed by ATC.
3. YANKEE is indicated by a red/white container.
4. Pilots shall strictly adhere to the circuits as indicated on the charts, unless otherwise instructed by ATC.
5. Standard circuit altitude is 1000 FT AMSL for inbound VFR traffic.
Standard altitude for VFR training circuit is 500 FT AMSL.
6. Caution: helicopter operations north of the runway. The FATO, helicopter exercise area (HELEX) and helicopter training circuit are available for local helicopter training operators only.
7. VFR reporting points positions:

| VFR reporting point | Position |
|---------------------|------------------|
| BRAVO | 522442N 0053502E |
| MIKE | 523249N 0053155E |
| X-RAY | 522817N 0052904E |
| YANKEE | 522608N 0053210E |

4.2 Visual departure procedures during UDP

1. Pilots must have obtained start-up clearance from ATC before starting engines. A request for start-up shall be made to Lelystad Delivery; clearance for start-up will either be issued immediately or at a specified time depending on traffic. A request for start-up includes:
 - aircraft identification (e.g. PHSPY);
 - entry point manoeuvring area (e.g. at G1);
 - ATIS information (e.g. information J);
 - flight rules (e.g. VFR);
 - destination (e.g. Hilversum);
 - routing (e.g. BRAVO Departure or direct Almere);
 - arrival routing, for local flights only (e.g. MIKE Arrival or direct X-RAY);
 - intentions (e.g. circuits or touch-and-go);
 - request start-up.
2. Visual departure routes:

| | | |
|---------------|-----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| RWY 05 | BRAVO Departure | <ul style="list-style-type: none">• After take-off, follow the VFR route to BRAVO.• Climb to and maintain 1000 FT AMSL.• Northwest abeam YANKEE, turn left to BRAVO.• Remain at least 500 M southwest of the road until BRAVO. |
| | MIKE Departure | <ul style="list-style-type: none">• After take-off, follow the VFR route to MIKE.• Climb to and maintain 1500 FT AMSL.• Remain at least 500 M east of the highway until MIKE. |
| RWY 23 | BRAVO Departure | <ul style="list-style-type: none">• After take-off, follow the VFR route to BRAVO.• Climb to and maintain 1000 FT AMSL.• West abeam YANKEE, turn right to BRAVO.• Remain at least 500 M southwest of the road until BRAVO. |
| | MIKE Departure | <ul style="list-style-type: none">• After take-off, follow the VFR route to MIKE.• Climb to and maintain 1500 FT AMSL.• Remain at least 500 M east of the highway until MIKE. |

3. Maintain procedure altitude within CTR.
4. Report leaving the CTR over the designated reporting point.

4.3 Visual approach procedures during UDP

1. Contact Lelystad TWR 2 minutes before reaching the CTR boundary for permission to enter the CTR. A request to enter the CTR includes:
 - aircraft identification (e.g. PHSPY);
 - position (e.g. 2 NM northeast of MIKE);
 - ATIS information (e.g. information J);
 - request for entry;
 - routing (e.g. MIKE Arrival or direct X-RAY);
 - intentions (e.g. full stop or touch-and-go).
2. Visual arrival routes

| | | |
|---------------|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| RWY 05 | BRAVO Arrival, overhead joining | <ul style="list-style-type: none"> Enter the CTR at 1300 FT AMSL. From BRAVO follow the VFR route to YANKEE. Remain northeast of the road. Overhead the woods turn left to YANKEE. Report east abeam YANKEE and follow ATC instruction. If no ATC instruction is received, hold over YANKEE and expect traffic on both the arrival and departure route. Proceed overhead and cross the runway as instructed by ATC. Descend to circuit altitude and turn left to join downwind RWY05 (lefthand circuit) as instructed by ATC. |
| | MIKE Arrival, direct joining | <ul style="list-style-type: none"> Enter the CTR at 1500 FT AMSL. From MIKE follow the VFR route to X-RAY. Remain at least 500 M west of the highway. Report abeam X-RAY and follow ATC instruction. If no ATC instruction is received, hold over X-RAY and expect traffic on the arrival route. Descend to circuit altitude and turn right to join downwind RWY05 (lefthand circuit) as instructed by ATC. |
| RWY 23 | BRAVO Arrival, overhead joining | <ul style="list-style-type: none"> Enter the CTR at 1300 FT AMSL. From BRAVO follow the VFR route to YANKEE. Remain northeast of the road. Overhead the woods turn left to YANKEE. Report east abeam YANKEE and follow ATC instruction. If no ATC instruction is received, hold over YANKEE and expect traffic on both the arrival and departure route. Proceed overhead and cross the runway as instructed by ATC. Descend to circuit altitude and turn right to join downwind RWY23 (righthand circuit) as instructed by ATC. |
| | MIKE Arrival, direct joining | <ul style="list-style-type: none"> Enter the CTR at 1500 FT AMSL. From MIKE follow the VFR route to X-RAY. Remain at least 500 M west of the highway. Report abeam X-RAY and follow ATC instruction. If no ATC instruction is received, hold over X-RAY and expect traffic on the arrival route. Descend to circuit altitude and turn left to join downwind RWY23 (righthand circuit) as instructed by ATC. |

4.4 VFR traffic circuits

4.4.1 General

RWY 05: a lefthand circuit, maintain 1000 FT AMSL until turning base.

RWY 23: a righthand circuit, maintain 1000 FT AMSL until turning base.

Note: for traffic reasons pilots may be instructed to extend downwind.

Pilots shall wait for and adhere to ATC clearances and make routine reports (conform ICAO Doc 4444 PANS-ATM and ICAO Doc 9432 Manual of radiotelephony).

After joining the circuit and for every following circuit:

- Report downwind and intentions (e.g. "touch-and-go", "full-stop" or "practice go-around").
- ATC will issue a sequence number, the traffic to follow, and additional instructions.
- Do not turn base before the traffic to follow and only after receiving your sequence number.
- After receiving your sequence number, turn base and final at own discretion.
Maintain own separation from other VFR traffic.
- Reporting final is compulsory when no landing clearance is received.
- In case of a go-around return to standard circuit, unless instructed otherwise by ATC, and contact ATC.

4.4.2 VFR training circuits

Training circuit RWY 05 lefthand and RWY 23 righthand at 500 FT AMSL. In case of a go-around return to training circuit, unless instructed otherwise by ATC, and contact ATC. Downwind is marked by a visual reference marking on the ground.

Prior to startup, the pilot can request Lelystad Delivery to use the VFR training circuit. If the VFR training circuit is not available, a request can be made to use the standard circuit at 1000 FT AMSL for a VFR training flight.

For local aerodrome regulations related to the VFR training circuit, see AD 2.20.

4.5 Communication failure procedures

4.5.1 General

- Select transponder code 7600.
- If possible call Amsterdam ACC Supervisor on telephone number +31 (0)20 406 3999.

Note: Use telephone connection to mitigate COM failure only. All telephone calls will be automatically recorded.

- If telephone connection is disconnected prematurely (before read-back), revert to communication failure procedures below.

4.5.2 VFR outbound

In case of communication failure adhere to the departure instructions. If the departure instructions contain a clearance limit in the CTR, act in accordance with paragraph 4.5.4.

4.5.3 VFR inbound**4.5.3.1 Via BRAVO and MIKE Arrival**

- In case of communication failure before X-RAY and YANKEE, leave the CTR according to the BRAVO or MIKE Departure and divert to an appropriate aerodrome.
- In case of communication failure over or after X-RAY and YANKEE, execute a circuit for the last received and acknowledged runway as short as practicable. Make a full stop landing and vacate the runway as soon as possible. In case of go-around execute a similar circuit (be aware of the fact that your flight path could interfere with the flight path of other aerodrome traffic).

4.5.3.2 Via a different route to the field

- In case of communication failure before joining the circuit, act in accordance with paragraph 4.5.4.
- In case of communication failure over or after a position from where to join the circuit, act in accordance with paragraph 4.5.3.1 item b.

4.5.4 VFR crossing the CTR

In case of communication failure leave the CTR via the shortest route, maintain altitude until outside the CTR, do not cross runway centre line and proceed to an appropriate aerodrome.

EHLE AD 2.23 ADDITIONAL INFORMATION**1 CAUTIONS AND ADDITIONAL INFORMATION**

1. YANKEE or ZULU flight plans:

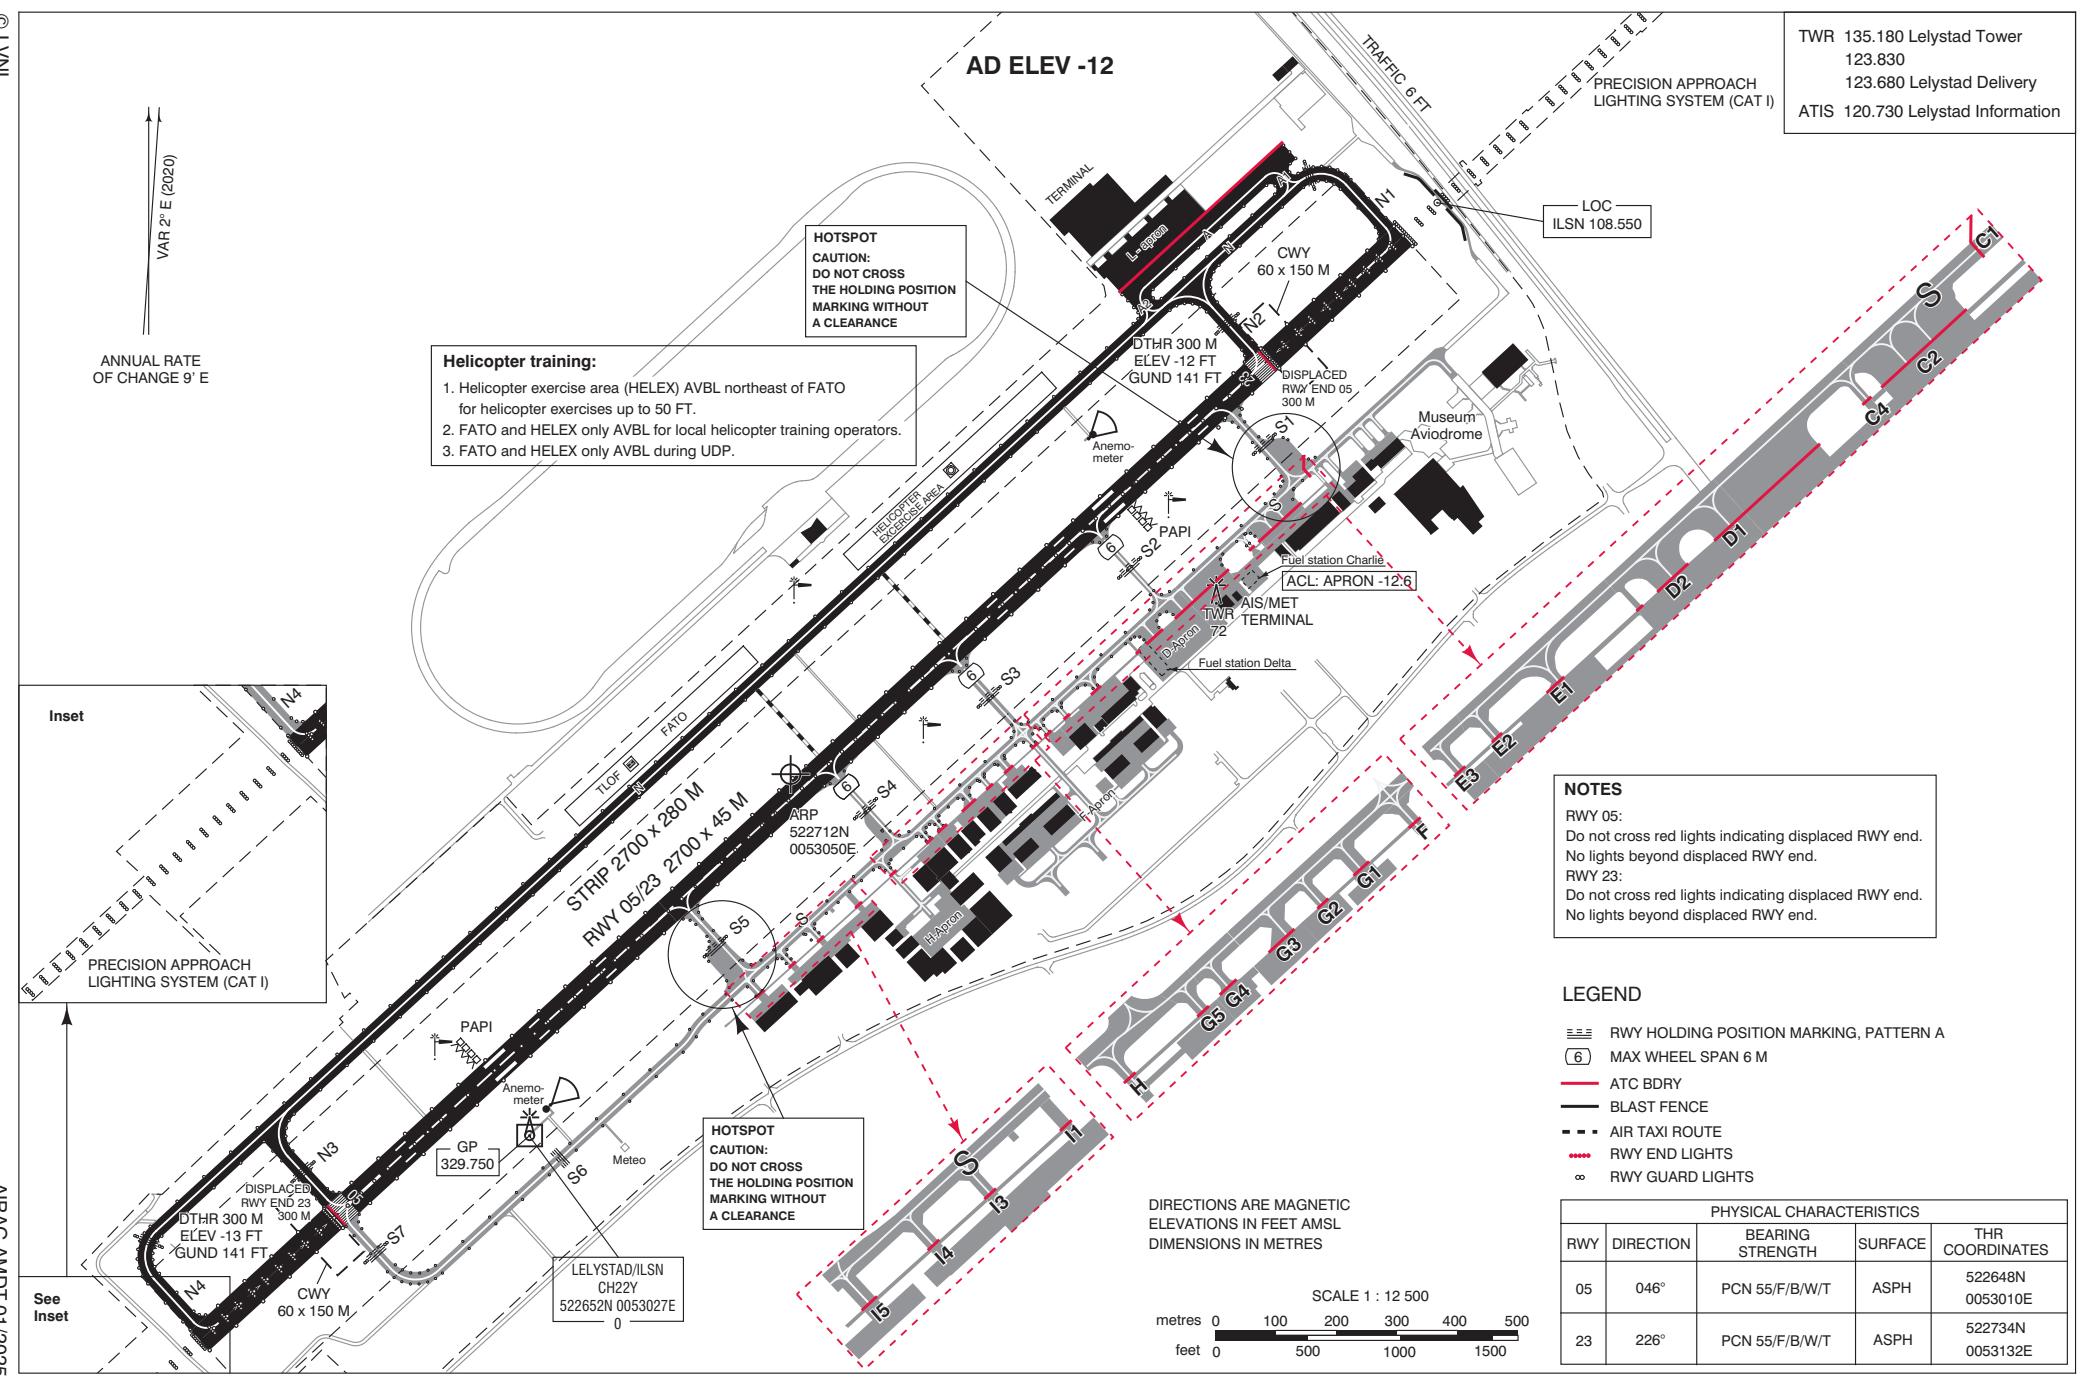

| | ARR: cancel IFR, continue VFR | DEP: cancel VFR, continue IFR |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| REQ > FL 055 | <ul style="list-style-type: none"> will file BADEX or EKNON as final IFR waypoint; will cancel the IFR flight plan prior to entering Lelystad TMA 3; be advised to contact Lelystad TWR 2 minutes before reaching the CTR boundary for permission to enter the CTR, as described in paragraph 4.3 item 1; will receive an ATC instruction to follow either a route for a direct final or one of the VFR arrival routes, as described in paragraph 4.3 item 2. | <ul style="list-style-type: none"> will receive rerouting along a SID trajectory with GRONY, ARNEM, NAPRO, KUDAD, IDRID or AMGOD as first IFR waypoint; will be provided with an IFR clearance (after radio contact) by MILATCC Schiphol. |
| REQ < FL 055 | <ul style="list-style-type: none"> will adhere to the VFR approach procedures and routes as described in paragraph 4.3; will cancel the IFR flight plan prior to entering Lelystad TMA 2 or 3, or Lelystad CTR; be advised to contact Lelystad TWR 2 minutes before reaching the CTR boundary for permission to enter the CTR, as described in paragraph 4.3 item 1; will receive an ATC instruction to follow either a route for a direct final or one of the VFR arrival routes, as described in paragraph 4.3 item 2. | <ul style="list-style-type: none"> will adhere to the VFR departure procedures and routes as described in paragraph 4.2. |
| Cautions for flights departing on a ZULU flight plan: | | |
| <ul style="list-style-type: none"> Departures on the SID trajectory of RWY 23 shall beware of glider site Biddinghuizen and VFR BRAVO Departure below the lateral path of the SID. VFR flight rules apply until the IFR clearance is received. | | |
| Note: crossing Schiphol TMAs is not permitted for all YANKEE or ZULU flight plans. | | |

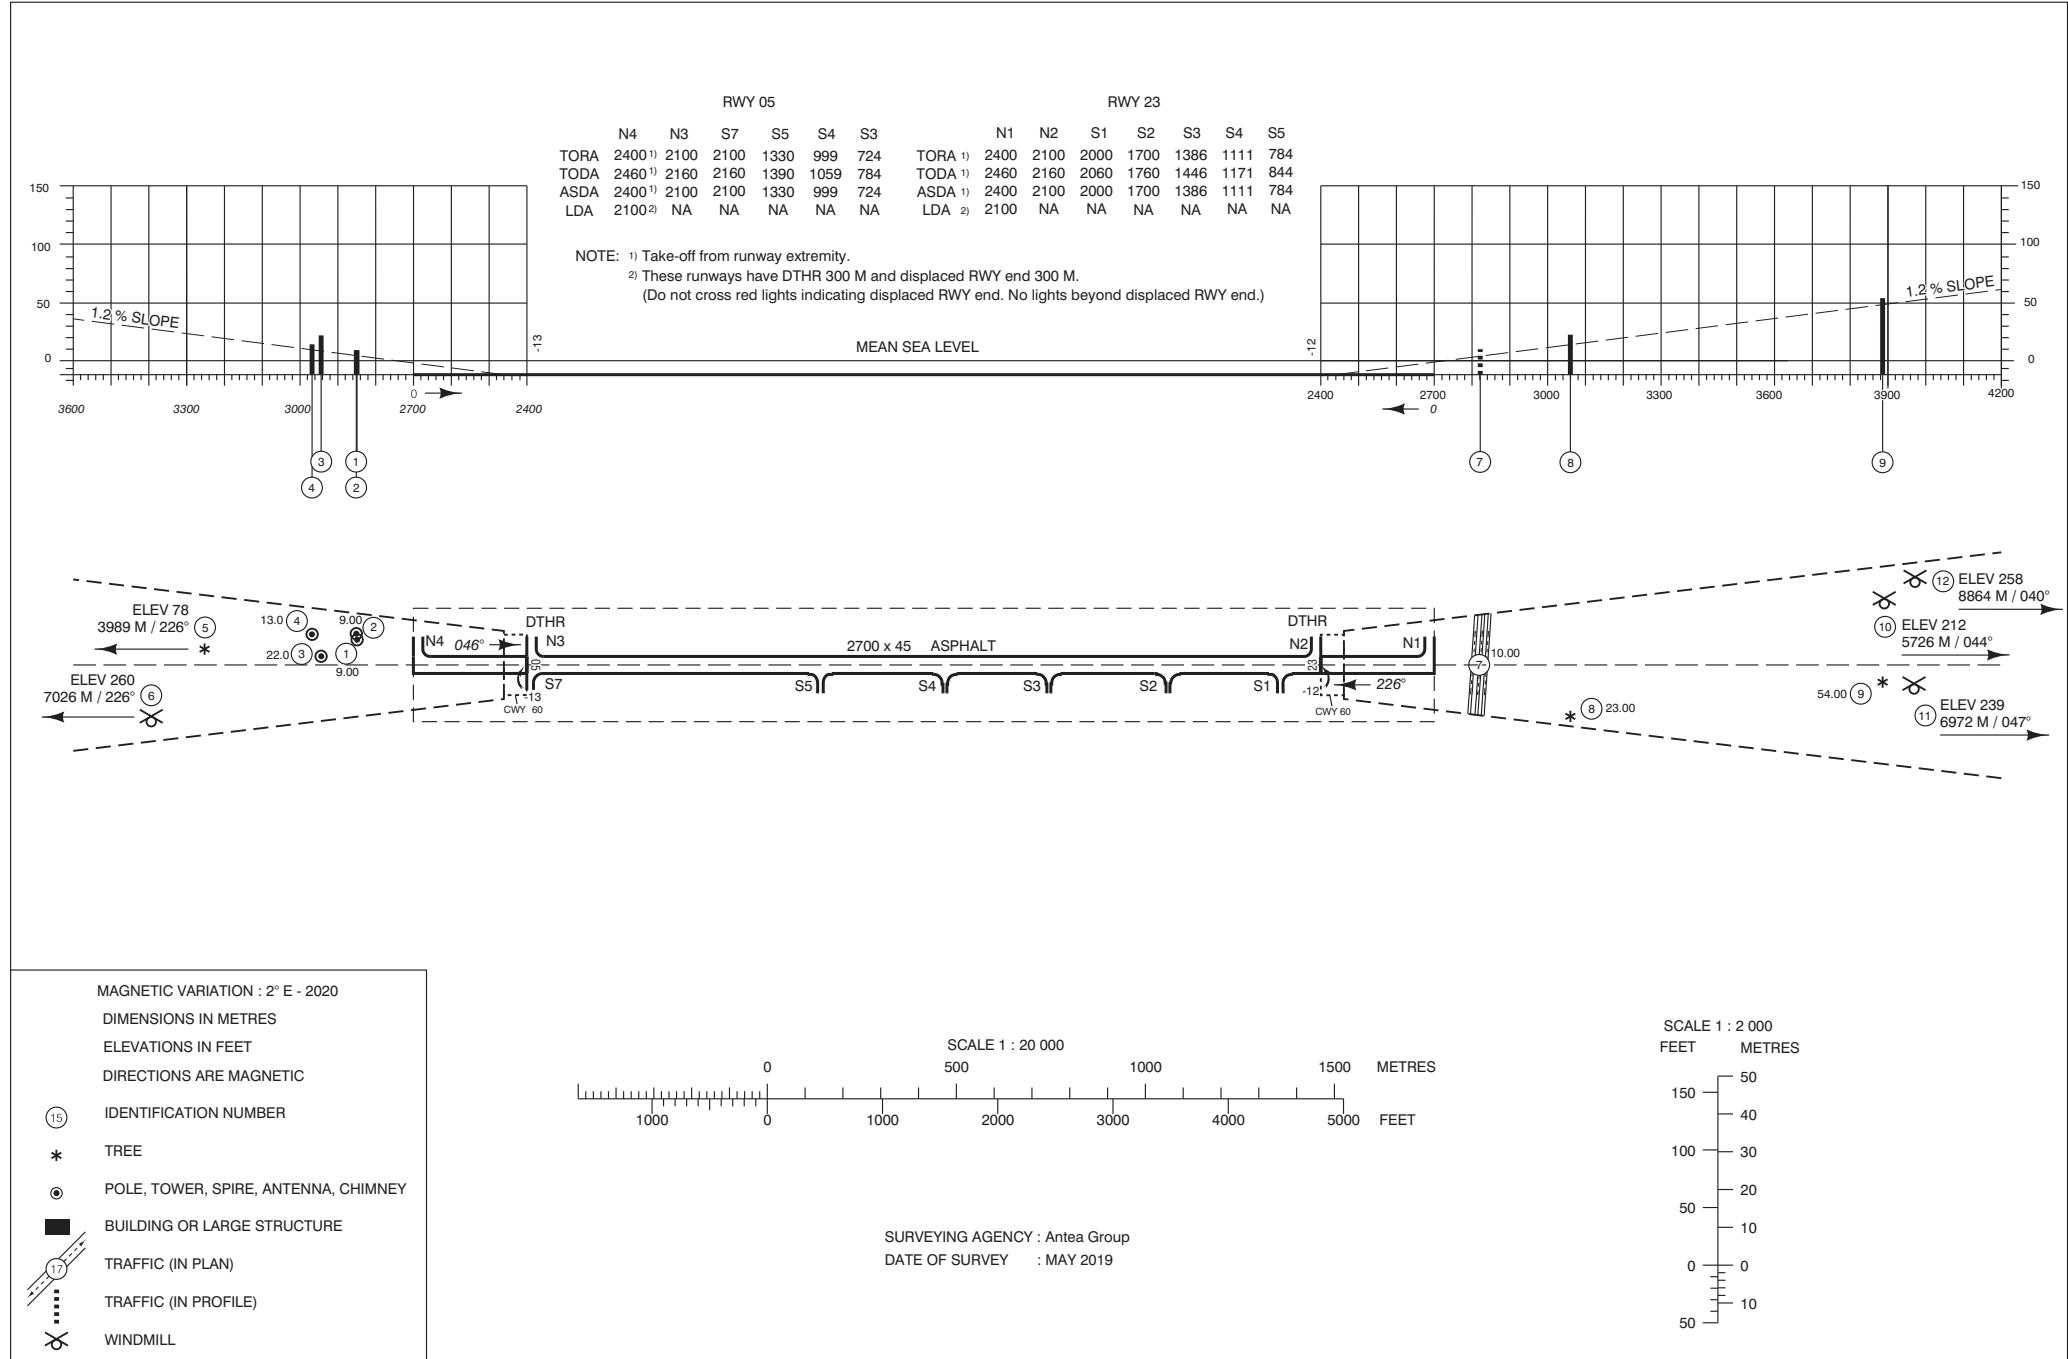

- Glider site Biddinghuizen is situated 3.3 NM NE of BRAVO. At the glider site, glider activities with winches may take place.
- Pilots are urgently requested not to execute VFR flights in the vicinity of the published instrument arrival and departure routes within the Lelystad CTRs and TMAs.
- Pilots shall not report switching off engine after landing.
- Pilots shall be aware that in the vicinity of the aerodrome ATC gives priority to:
 - aircraft in state of an emergency;
 - hospital and police aircraft with the status priority or scramble;
 - aircraft engaged in SAR operations.
- The ATC tower is an obstacle of 72.2 FT AMSL. Pilots are advised not to deviate laterally towards the tower during a go-around, especially under strong crosswind conditions.
- High visibility clothing is mandatory for aircraft crew and personnel on the D-apron, including the fuel stations Charlie and Delta, and on the L-apron. Passengers must be escorted at all times by crew or handling personnel.

NOTES:

- This chart may only be used for cross-checking of altitudes, assigned while the aircraft is identified by the responsible ATC unit.
- Aeronautical data and minimum vectoring altitudes are provided only for the relevant CTR and TMA.
- Temperature correction: when below -7°C the FAVA is 1400 FT. For other MVA: when below -14°C add 300 FT.
- A descent clearance to the FAVA will only be issued when the aircraft is established on the ILS final approach track, or on an intercept of 30 degrees or less.
- In case of a communication failure, execute the COM failure procedure of the last assigned approach.
